Youth Exchanges

Within the European 'Youth in Action' Programme, a Youth Exchange is a project where young people work and live together in an international group for a specific time. It consists of preparation, implementation, and follow-up activities. For the duration of the Youth Exchange, young people undertake a joint programme of activities with specific aims and objectives.

Young people from different countries and backgrounds co-operate with each other supported by experienced youth workers and leaders. They develop personal, professional, and intercultural competences.

Youth Exchanges foster the mobility of young people in Europe. They encourage initiative and creativity in young people, facilitate their active participation in the project, and thereby provide an intercultural learning experience.

Offering the added value of a European dimension, Youth Exchanges are quality-checked regarding content criteria and implementation.

Project description

The exchange project was developed and implemented in cooperation with the following partners:

Gleisdreieck e.V.; profundo e.V.
Asociación Cultural Marineda
Güven eğitim ve sağlık vakfı
Fundacja kwadrat

The aim and the specific objectives of the project were:

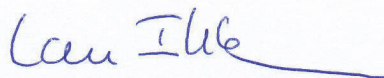

Future Food is a project dealing with the concerns of our current behaviours in relation to food. Each visit in the supermarket is linked to the treatment of our environment and its changes. Sustainability and consumption are global and interlinked topics that are in the interest of each one of us.

Main activities:

The project enabled young people of the 4 countries to spend 11 days in Hannover in order to discover together the field of sustainability, consumption and globalisation. We shared information on the main subjects, talk about personal experiences and the national and european dimension.

The main achievements of the project were the following:

We made new experiences and gained more knowledge about the topic. We visited a local farm, shared the national perspectives, discussed a lot and shared our results with local people. The exchange of ideas made us thinking of our actual consumption habits and being more reflected in the future.
